Fact Sheet for Installing of a Photovoltaic/Solar Panel System

This fact sheet provides the information required and links to submit for a photovoltaic/solar panel system for your property.

Filing Requirements:

- A building permit is required for installing solar panels. For a permit application, fees and installation. Please refer to and [review the installation guide](#).

Ground Mounted Solar Equipment

- A ground-mounted solar panel and any such associated equipment shall be setback a minimum of 3-feet from any property line. (Section 9-101-D-1(d)-2)

Roof mounted Solar Equipment

- The maximum height of any installed solar panel, shall comply with the zoning district height requirements of the zoning district of which the solar panel is to be installed. Please call Community Development at (708)-687-4050 to verify the zoning designation of the subject property.

Other Code Considerations:

- Screening of the installed solar panel is not required.
- Solar panel frames should either, match the solar panel color or the building wall or roof color.
- Any associated conduit and panel boxes should be same color as the building wall or roof color.

If you have any questions on solar panels, please contact City Hall at (708)-687-4050.
Thank you.
